

070M20

070M20 round and flat bar

070M20 steel stockholders and suppliers, delivering throughout the UK.

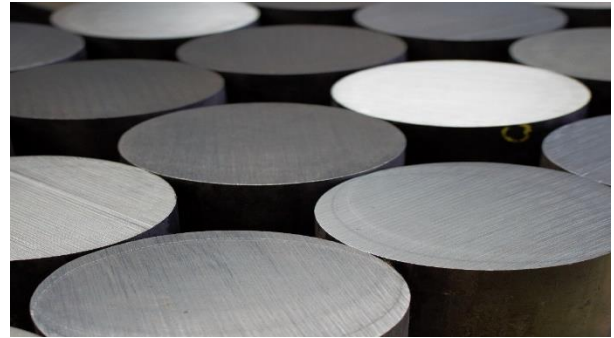

West Yorkshire Steel are suppliers of 070M20 round bar and flat bar. 070M20 is an unalloyed low carbon mild steel grade supplied as a hot rolled or bright drawn finish bar. As a low carbon steel grade it provides low strength with good machinability and is suitable for welding.

Alternative carbon steel grades we supply

Applications

Commonly used for general engineering 070M20 is suitable for applications such as bolts, shafts, spacers, hubs, base plates, brackets, fixtures and jigs.

Analysis

Carbon	0.16-0.24% max	Silicon	0.10-0.40%
Manganese	0.50-0.90% max	Sulphur	0.05% max
Phosphorous	0.05% max		

Annealing

070M20 is commonly supplied bright drawn or as rolled. If annealing is required heat to 880-910°C, furnace cool.

Hardening

As a low carbon steel 070M20 is not ideally suited for heat treatment ([080M40](#) or [070M55](#) may be a better suited option). If hardening is required heat to a temperature of 880-910°C. Quench in water and temper.

Heat Treatment

Heat treatment temperatures, including rate of heating, cooling and soaking times will vary due to factors such as the shape and size of each 070M20 component. Other considerations during the heat treatment process including the type of furnace, quenching medium and work piece transfer facilities. Please consult your heat treatment provider for full guidance on heat treatment of 070M20 steel.

Certification

070M20 steel is available with a cast and analysis certificate or certificate of conformity, please request when placing any orders.

Quality Assured Supply

070M20 steel is supplied in accordance with our ISO 9001:2015 registration.
